***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 6, and claims 1-5, 7-30, 34-35 and 41-44, all in part, drawn to a plastid transformation vector encoding a protective antigen for anthrax, plants and plastids transformed with the vector, and a method of using it to produce the antigen.

Group II, claim(s) 31-33, and claims 1-5, 7-30, 34-35 and 41-44, all in part, drawn to a plastid transformation vector encoding a protective antigen for plague, plants transformed with the vector, and a method of using it to produce the antigen.

Group III, claim(s) 36-38, drawn to a vaccine conferring immunity to *Bacillus anthracis* and a process for administering the vaccine.

Group IV, claim(s) 39-40, drawn to a vaccine conferring immunity to *Yersinia pestis* and a process for administering the vaccine.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: They do not share a special technical feature.

The technical feature shared by Groups I-II is a plastid vector encoding a protective antigen.

Art Unit: 1638

The technical feature shared by Groups III-IV is an orally administered vaccine to a bacterium.

Thus, the groups share no technical feature.

Furthermore, CALGENE LLC (WO 00/03012, cited in the search report) teaches plasmid transformation vectors encoding the protective antigen aprotinin and plants transformed with it (pg 23-24 and 43), rendering the invention of claim 1, among others, not novel. Thus, the technical feature shared by Groups I-II is not special.

3. Applicant is advised that for the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### ***Sequence Rules***

4. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825.

Sequence identifiers are missing from the sequence in ¶64.

Art Unit: 1638

Full compliance with the sequence rules is required in response to this Office action. A complete response to this Office action must include both compliance with the sequence rules and a response to the issues set forth herein. Failure to fully comply with both of these requirements in the time period set forth in this Office action will be held to be non-responsive.
